

O.E.M. Replacement Seals

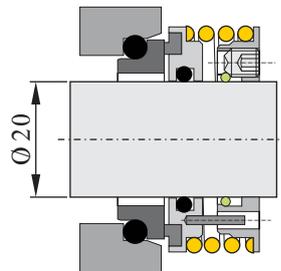

Mechanical seals for Flygt® pumps

The main application for Flygt pumps is sewage pumping in treatment plants. They are also widely used for stormwater pumping, raw water handling, irrigation, and manure handling in agriculture. We produce a range of high-quality, reliable, and precisely engineered replacement seals for Flygt pumps offering competitive pricing and easier fitting and installation, with no special tools or pump modifications required. Some pumps use an upper and lower seal arrangement, while others are equipped with plug-in double cartridge mechanical seals.

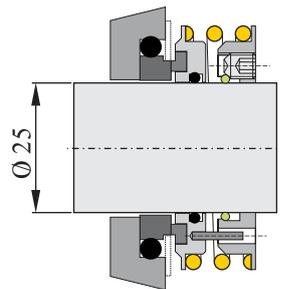

- Robust & quality seal design
- Stainless steel metal parts
- Easy installation without special tool required

Flygt pump: 3068		D20
Upper Seal	Lower Seal	
V3068 UP	V3068 LO	
Rotary face: Carbon	Rotary seal face: TC	
Stationary seat: SiC	Stationary seat: TC	
Elastomers: Viton	Elastomers: Viton	
Metal Parts: SS304	Metal Parts: SS304	
Optional materials on request		

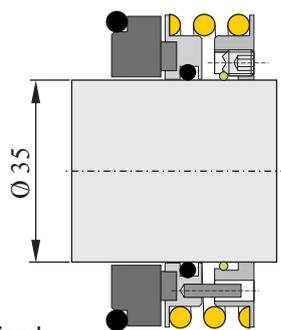

- Robust & quality seal design
- Stainless steel metal parts
- Easy installation without special tool required

Flygt pump: 3102		D25
Upper Seal	Lower Seal	
V3102 UP	V3102 LO	
Rotary face: Carbon	Rotary seal face: TC	
Stationary seat: SiC	Stationary seat: TC	
Elastomers: Viton	Elastomers: Viton	
Metal Parts: SS304	Metal Parts: SS304	
Optional materials on request		

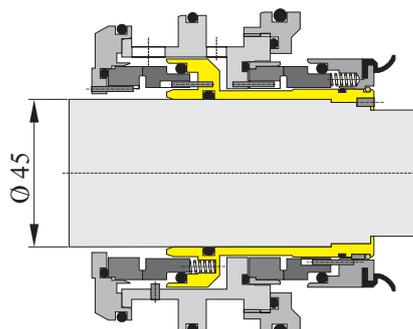

- Robust & quality seal design
- Stainless steel metal parts
- Easy installation without special tool required

Flygt pump: 3127		D35
Upper Seal	Lower Seal	
V3127 UP	V3127 LO	
Rotary face: Carbon	Rotary seal face: TC	
Stationary seat: SiC	Stationary seat: TC	
Elastomers: Viton	Elastomers: Viton	
Metal Parts: SS304	Metal Parts: SS304	
Optional materials on request		

- Plug-in double cartridge seal
- Stainless steel metal parts
- Easy installation approach
- No special fitting tool required
- Robust & quality seal design

Flygt pump: 4650		D45
V4650		
Rotary seal face: SiC		
Stationary seat: SiC		
Elastomers: NBR / EPDM / Viton		
Metal Parts: SS304 / SS316		
Optional materials on request
