

# Type V7

Double, Balanced Cartridge mechanical seal

## APPLICATION

Steel Industry

Power

## PRODUCT DESCRIPTION

This type of mechanical seal is designed for demanding conditions, especially for boiling water. Its robust construction provides long service life in extreme industrial environments. The cartridge design allows for simple and efficient installation.

## WORKING CONDITIONS

A double, balanced, cartridge mechanical seal designed for operation in boiling water, with temperatures not exceeding 204°C and pressures up to 40 bar.
